(Istituto Dermatopatico dell' Immacolata : Latin)

Love skin as we love human

150 years of dermatic science

Origin of IDI (Institute Dermatopathic Immaculate)

- ◆ IDI is derived from Dermatology and Academy established by Friar Luizi Maria Monti in 1857.
- ◆ IDI has world's best dermatology treatment.
- ◆ IDI technology is the aggregation of dermatology, cosmetic surgery, vascular surgery, radiology, atopy laboratory, skin cancer laboratory and etc.
- ◆ IDI Clinic is the largest dermatology has over 500 sickbed with 400 dermatologists have cured annually over 500,000 patients. (www.idi.it)

Development background of Wish Formula Professional Line

- ◆ "Wish Formula Professional Line" was created by "IDI" in Italy.
- ◆ "IDI Fermentation Peeling" was developed by clinical experiences and bio-technology based on technical cooperation with 400 dermatologists.
- ◆ IDI have researched and developed variety of peeling product, experiment to improve and find cause of the skin disease. As a result, IDI have developed Wish Formula Professional Line (www.wishformula.com)

Cotterang Inc. is

Bio venture company which research and develop skin-functional cosmetics based on fermentation science. Our product is innovative program cosmetics amalgamated with tools and patent as like creativity of "Apple"

Our own brand Wish Formula has about 80 products that are distributed to over 850 dermatologies and aesthetics clinics and divided into a Professional Line and Homecare Line. Our product lines are comprised of bio fermentation peeling, acne, blackhead, whitening, wrinkle, anti-oxidant, anti-aging, sensitive, calming, moisturizing and multi-functional mask pack line(for face, eye, neck, body)

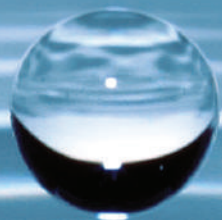

We have two patents related to peeling and eight trademarks registered by the Korean government. Our products have developed by dermatologist, oriental doctor, skin physiologist, cosmetic scientist and especially our CEO with a master's degree in cosmetics and have passed the KFDA testing for safety and effectiveness. We are making progress toward global hidden champions in cosmetics.

Use enough moisturizer for 2~3 days and avoid heavy exercise, sauna.

Avoid drinking, stress and overwork.

Start washing a day after getting peeling treatment.

Use enough sun block before going outside.

Common side effects after receiving peeling treatment.

Hot blush might occur for 1~2 days.

May feel dryness, our dead skin cells and feel pores fighter.

Skin may itch and red bumps might appear.

These symptoms may occur, during process of recovery. It will naturally disappear.

What is BIO Fermentation Peeling?

New concept of high technology peeling

Inputs peeling base per purpose with selection of high-enriched fermentation peeling sources.

Hypo-allergenic, Painless

Recommended to customers who are afraid of feeling pain during peeling treatment.

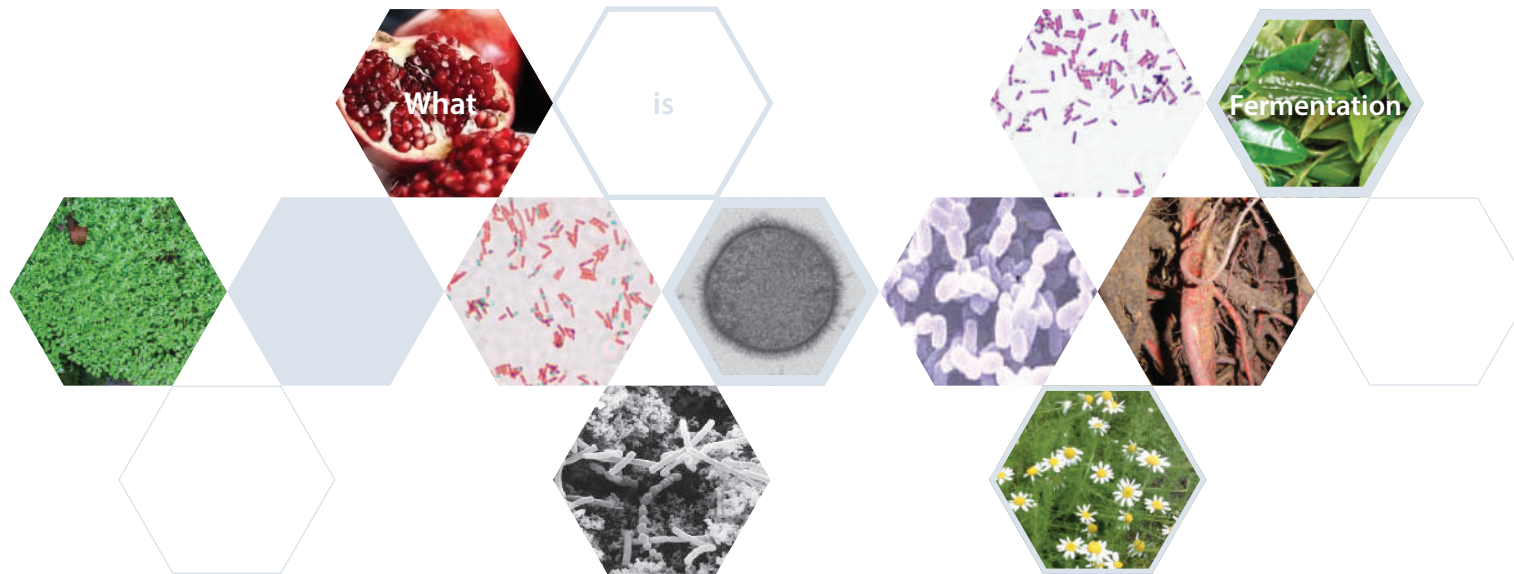

Very Safe and Easy

It does not take long to receive the procedure and even sensitive skin can receive the treatment. Peeling treatment can be applied at 1 week intervals.

Does not affect everyday life

Everyone can go back to everyday life after receiving peeling treatment.

Unlike other peeling treatments, our product shows instant effect on pigmentation, red spots, rash, edema and lowered occurrence of side effect.

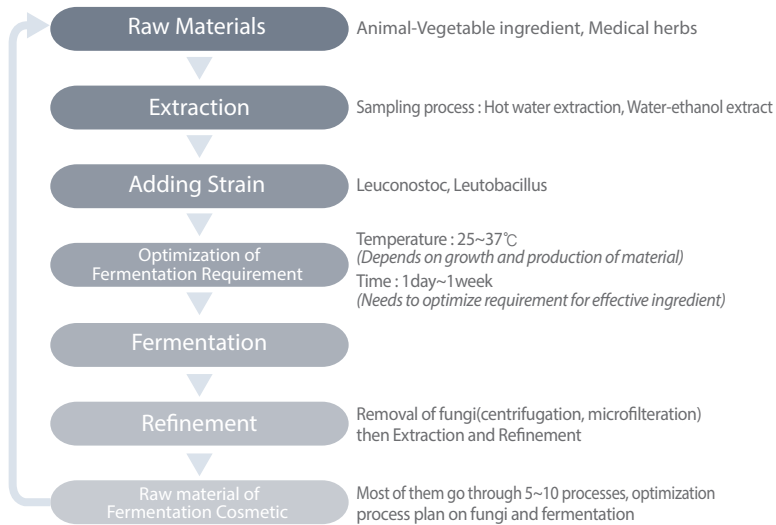

Fermentation is a miracle of nature

In a broad sense, fermentation can be described as process which uses microorganism or fungus to get valuable substances. In a cosmetic view of point, fermentation can be explained as the process of a microorganism's enzyme to decompose organic organisms. Thus, in the process of fermented microorganisms it has strengthens the effect and uses nano-sized active. Effective substances to help penetrates through the skin and increases skin absorption to make it skin-friendly to protect skin from external stimuli and helps to maintain elasticity and increased immunity of the skin. Also, detox effect helps to remove small harmful substances. Only 10% of the effects of fermentation have been proved, while the remaining 90% of unknown effects are expected to be researched.

World's attention on fermentation

World's famous global futurologist Elvin Toffler said "The world will be caught up in the beauty of fermentation." Everyone is now giving paying attention to the science of fermentation. In 2006, "Health" magazine nominated fermentation as world's top 5 foods, which have drawn attention. Three of the top 5 foods were fermentation products. America's newsmagazine "Time" have admitted that Asian's secret of long life is closely linked to consuming fermented food.

Manufacturing Process

Excellent Strain Fermentation Technology

State-of-the-art fermentation technology that extracts enzyme ingredients in a short time.

Reason to be recognized as a luxury cosmetic

Maximization of Nutrition

After going through fermentation process it doubles the nutrition.

If a wine goes through fermentation process it becomes 7 times more effective than the normal wine

Increase in Absorption

Microorganisms help to digest the functions that human bodies are supposed to do.

Fermented foods use enzymes to break down the cells into small pieces to supply nutrition to the human body in a short period of time.

Detoxification

Microorganism prevents contaminants from breeding

Produces an antibiotic substance, which removes bacteria from the human body.

Common Cosmetics

VS

Natural Fermentation Cosmetics

| | |
|---|--|
| Use trouble causing substances (chemical compound) | Does not use trouble causing substances (natural fermentation) |
| Concept of covering skin (coating) | Concept of providing nutrition to skin texture |
| Destroys nutrition ingredients (long-term storage) | Maintains nutrition ingredients (long-term storage) |
| Moisturizing level drops 90% after an hour Unstable moisturizing effect | Maintains 90% of moisturizing level after 6 hours Stable moisturizing effect |
| Activation of antioxidant 20~60% (Extract) | Activation of antioxidant 95% or above |
| Poor brightening effect "restrictive effect using only arbutin, kojic acid, vitamin c or natural extract" | Outstanding brightening effect "Use variety of ingredients to suppress tyrosinase enzyme from forming melanin pigment" |
| When applying the product, skin gets greasy or oily | When applying the product, quick absorption (Increased absorption) |
| Lots of side effects when peeling "Skin can be irritated by chemical pH and etc" | Almost no side effects when peeling "Fermented ingredients dismantles the sebum and smoothes the skin" |
